

Absorption Rates

Last Modified on 19/07/2017 1:56 pm AEST

Quick Steps: Membership > Subscription Types > Select Subscription Type > Actions > Edit > Financial > Apply Setting > Save

1. In One Sport Technology, select **Membership** from the top menu, then **Subscription Types** from the left hand menu.
2. Search the relevant subscription type and click **Actions, Edit**.
3. Select **Financial** and apply the relevant setting to that subscription type. Click **Save**.

‘Absorb System Access Fee’

- Yes: The subscription type will appear as stipulated in Cost.
- No: The system fee will be added to the cost upon payment.

Please note that the system access fee is deducted from the entire transaction amount paid through the payment gateway. Therefore, if you choose 'No' to absorb the system access fee, then the amount settled back to your organisation is the entire amount paid in the gateway by the end user, less the system access fee. Please ensure your subscription types are priced accordingly

NOTE: When adding splits to an entity above, the absorption rate from the current organisation will be applied. This will only occur when a subscription has not be distributed/syndicated from an above entity.

For example: Club creates a split for their Association. If the club has chosen to pass on the fee to the member, the split for the Association will also be passed on.
