This article relates to Site 1.0

The **Basic Information** section is the best place to start when building your website.

The first tab is **Website Details**:

The screenshot displays the 'Basic Information' section of the SportsTG Sample System. The page is titled 'SportsTG Sample System' and shows the user is logged in as 'System Administrator'. The navigation menu includes 'Home', 'Website', 'Members', 'Subscriptions', 'Shop', 'Registrations', 'Tools', and 'Administration'. The 'Website' tab is selected. The 'Basic Information' section has a 'Save' button and a 'Cancel' button at the top. Below this, there are four tabs: 'Website Details', 'Welcome Message', 'What's New', and 'Menu Location Options'. The 'Website Details' tab is active, showing the following fields:

- Website Name:** SportsTG Sample System
- Website URL:** www.sportstg.com
- Meta Tags:** sport.membership.events.member

There are 'Save' and 'Cancel' buttons at the bottom of the form. The footer shows the time '29:09' and the text 'SportsTG'.

Enter the **Website Name** as you would like it to appear on the title tab above the address bar and in search engines.

Enter the domain name of your website in the **Website URL** box if you have purchased a custom domain. For help with updating your custom domain settings to point to your GameDay website, please [click here](#).

Meta Tags help to ensure that your website appears in search engine results. These tags are not seen by the end user, but are instead found within the code of the website to ensure that your website is picked up when a potential customer or member is searching for your page. These tags can be entered into the **Meta Tag** field and should be one to three word phrases separated by a comma. The total number of words inserted should not exceed fifteen as many search engines will not read past this total.

The second tab is **Welcome Message**, which allows you to add text to your homepage; Under **Title** you can add a header to the text. You can add the main body of text into the Rich Text Editor, which functions just as if you were using Microsoft Word or a similar text editor.

The third tab is **What's New**. This creates a box in the top right corner that can be used to display any information that you want to stand out. Some examples of using this function might be important information, a major sponsor that wants to stand out or your latest memo.

The final tab to edit is **Menu Location Options**. This allows you to add **Home Page** and **Contact Us** items to your menu bar. The details for the contact us form will be automatically pulled in from the details filled in on the **Administration** section of your console.

The screenshot displays the 'SportsTG Sample System' administration interface. At the top right, it shows 'Logged in as: System Administrator' and a 'Log Off' button. A navigation bar includes 'Home', 'Website', 'Members', 'Subscriptions', 'Shop', 'Registrations', 'Tools', and 'Administration'. A sidebar on the left lists various system components like 'Basic Information', 'Contact Information', 'Club Directory', etc. The main content area is titled 'Basic Information' and contains a tabbed interface with 'Website Details', 'Welcome Message', 'What's New', and 'Menu Location Options'. The 'Menu Location Options' tab is active, showing two dropdown menus: 'Home Page' and 'Contact Us'. The 'Contact Us' dropdown is open, showing options: 'None', 'Top', 'Main', and 'Other Menu Links'. The 'None' option is currently selected. 'Save' and 'Cancel' buttons are visible at the top and bottom of the form area. The footer shows the time '25:53' and the 'SportsTG' logo.
