

How do I set my website live?

Last Modified on 07/03/2016 10:01 pm EDT

Once the website is ready to go live (i.e. your content has been added and the domain is pointing to the STG IP address) go to the menu WEBSITE / BASIC INFORMATION.

Click on EDIT and select the WEBSITE DETAILS tab.

Enter the URL in the WEBSITE URL section and click SAVE.

The website will be considered “live” at this point.
