

Can I view how many people have looked at my website?

Last Modified on 07/03/2016 10:08 pm EDT

STG utilizes Google Analytics tracking codes throughout its range of products.

To set this up please go to <http://www.google.com/accounts>

Setup a Google account and then go to <http://www.google.com/analytics> and create a website tracking code following the prompts.

If you have any issues creating the analytics please view Google Analytics Help - <http://www.google.com/analytics/support.html>

During the analytics setup process you will be presented with some tracking code to send to your website administrator.

Please forward this code to support@imgstg.com who will load this onto your site.
