# Embedding a YouTube Video into your Website

Last Modified on 15/06/2017 1:40 pm AEST

YouTube Videos are a great way to have engaging content on your website.

Embedding YouTube videos is the best way to add videos to the website as the video is brought through from your YouTube Channel rather than being stored on website and taking up bandwidth.

Please follow the steps to below on how to embed a YouTube Video into a HTML module

### A. Get YouTube video embed code

- Step 1: Go to the YouTube Video you wish to embed.
- Step 2: Select Share
- Step 3: Select Embed

#### Step 4: Copy Embed Code

+ Add to	A Share	••• More	181	<b>#1</b> 19
Share	Embed	Email		×
<iframe td="" w<=""><td>idth="560" he</td><td>ght="315" src="https://www.youtube.com/embed/RtD7sPNNMj8" frameborder="0" allowfu</td><td>llscreen&gt;</td></iframe>	idth="560" he	ght="315" src="https://www.youtube.com/embed/RtD7sPNNMj8" frameborder="0" allowfu	llscreen>

#### B. Add code to HTML Module

Login into your admin site and navigate to the page you wish to add the video to.

The page will need to have a HTML module added into order to add the YouTube Video.

#### Adding a HTML Module

Step 1: Select Modules > Add New Module > Search for HTML. Click and drag the module onto the page.
