

# What is Overtime Bidding?

*Last Modified on 18/08/2016 2:53 pm AEST*

Please note that all auctions on this site utilise overtime bidding.

This means if a successful bid is placed within 5 minutes of the scheduled closing time of an auction, then the auction will go into overtime.

Auction overtime results in the closing time for the auction being reset to 5 minutes from the time the bid was recorded.

An auction will continue to be extended until there are no further bids for a continuous 5 minute period.
