

# Using the Orders Heat Map

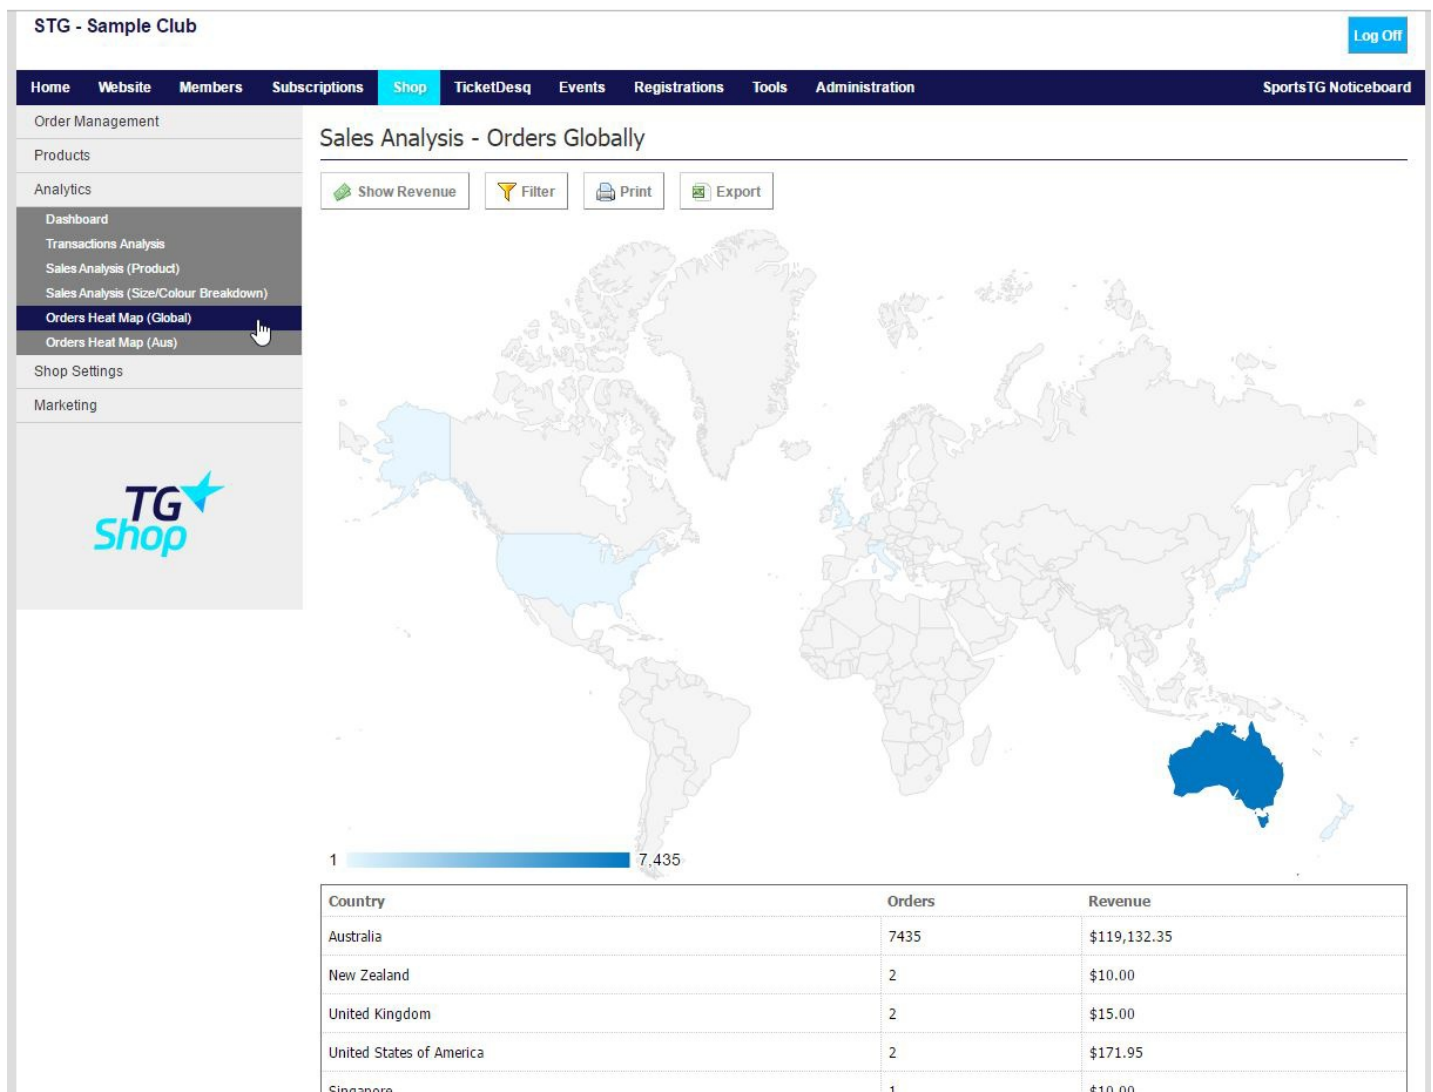

Last Modified on 29/09/2016 11:30 am AEST

**Quick Steps: Shop > Analytics > Orders Heat Map (Global) or Orders Heat Map (Aus)**

The Orders Heat Map gives you a visual representation of where throughout the world your orders are coming from. For Australian Shop users, this will also provide you with a breakdown by state throughout the country.

1. Within the Management Console, select **Shop** from the top menu, then **Analytics** from the left menu.

2. Select **Orders Heat Map (Global)**

or **Orders Heat Map (Aus)** from the expanded left menu

3. Here you can access the following options:

- View a breakdown of orders by location by number of Orders
- View a breakdown of orders by location by Transaction Revenue
- Print a copy of the Map, with sales analytics below
- Export information into Excel
- Filter dates to view analysis for only those orders within a certain date range

**Note:** The information displayed in this dashboard is up to the minute from the time you access the page. Use this information to keep track of where your orders are coming from so that you can market your store appropriately.
