Bye Points aren't calculating

Last Modified on 24/10/2016 3:59 pm AEDT

You will find that there are times when the bye points do not calculate the way you have set them to. There is a quick and easy way for administrators to correct this and this is outlined below

1. Select **Competitions** from the top menu of the bowls association in question
2. Choose the competition from the list in the centre of the screen
3. Go to the **Fixtures** section on the left hand side
4. For ALL games fixtured as a Bye please **Edit** the game
5. Without changing any details in the match press **Save**

This will reset the fixtured match and the bye points will automatically recalculate
