

# Adding a New Club or Organisation

Last Modified on 14/06/2018 1:12 pm AEST

SportsTG is able to create a new club database upon request however we cannot do this without the approval of your state or governing body

If you are a new Club requiring access: the first step is to contact your state or governing body and they will provide you with the appropriate form to complete.

If you are a Governing body, please complete [this form](#) . Bank details are required when completing this application form

Once you have completed all the details in the form and submitted this to our support team the club database will be created by a member of our support team. This process can take up to 5 business days to complete and we appreciate your patience
