

How to log into my website?

Last Modified on 16/12/2024 10:25 am AEDT

Your website will have a unique domain name which will be given to you when you sign up for our websites. This will be in a staging/testing environment that allows you to get step up before going live with your website.

You will have also been granted access to your website so you should have received an email to set a password - use these details when logging in. If you are unsure if you have been granted access please email the support team or give us a call.

To log into the admin side of your website you do the following:

1. Access your website URL and add **/wp-admin** to the end of it.

Will look something like: **testwebsite.fspdev.com/wp-admin**

2. Input your username - most likely your email address - and your password.

If you are unsure of your password or need to reset it, click the "lost your password" option on this page.

A screenshot of the Stack Commerce login interface. At the top, there is a dark blue header with the 'stackcommerce' logo in white. Below the header is a white login form with a thin grey border. The form contains two input fields: 'Username or Email Address' and 'Password'. The 'Password' field has a small eye icon to its right. Below the password field is a checkbox labeled 'Remember Me' and a dark blue 'Log In' button. At the bottom of the form, there is a link that says 'Lost your password?'.

3. Once logged in you will be taken to the "Website Setup dashboard" where you can view and manage your website by clicking on the relevant section.

Website Setup

Your Website Features

[help](#)
Overview of your website feature settings.

Header

[help](#)
Manager your website header, navigation and colours.

Sections

[help](#)
These sections will be used to build your home page. They can also be added to sub pages on your website.

Footer

[help](#)
The footer appears on the bottom of the page across your website. I contains four columns which you can add content to.
