

Coupon Management

Last Modified on 16/12/2024 12:24 pm AEDT

Coupons are a great way to offer discounts and rewards to your customers and can help promote sales across your shop.

If you want to use coupons with WooCommerce, you first need to enable them in WooCommerce. Go to: WooCommerce > Settings > General and tick the checkbox to Enable the use of coupons. Then Save Changes.

Adding a Coupon

To add a coupon Go to: **WooCommerce > Coupons.**

Create a new coupon by selecting **Add Coupon**. Or hover over an existing one to **Edit**. Enter these fields:

- **Coupon code** – Code used by the customer to apply the coupon. Must be unique as it's used as an identifier.
- **Description (optional)** — Info about coupon, e.g., Dates in effect, promotion, compensation, ticket number. For internal use.

Add new coupon

Coupon code

Description (optional)

Coupon data

- General**
 - Discount type: Percentage discount
 - Coupon amount: 0
 - Allow free shipping:
 - Coupon expiry date: YYYY-MM-DD
- Usage restriction
- Usage limits

Check this box if the coupon grants free shipping. A [free shipping method](#) must be enabled in your shipping zone and be set to require "a valid free shipping coupon" (see the "Free Shipping Requires" setting).

Under Coupon Data, there are three sections you can use to add restrictions and limits for the coupon: General, Usage Restriction, and Usage Limits.

General

Coupon data

- General**
 - Discount type: Percentage discount
 - Coupon amount: 0
 - Allow free shipping:
 - Coupon expiry date: YYYY-MM-DD
- Usage restriction
- Usage limits

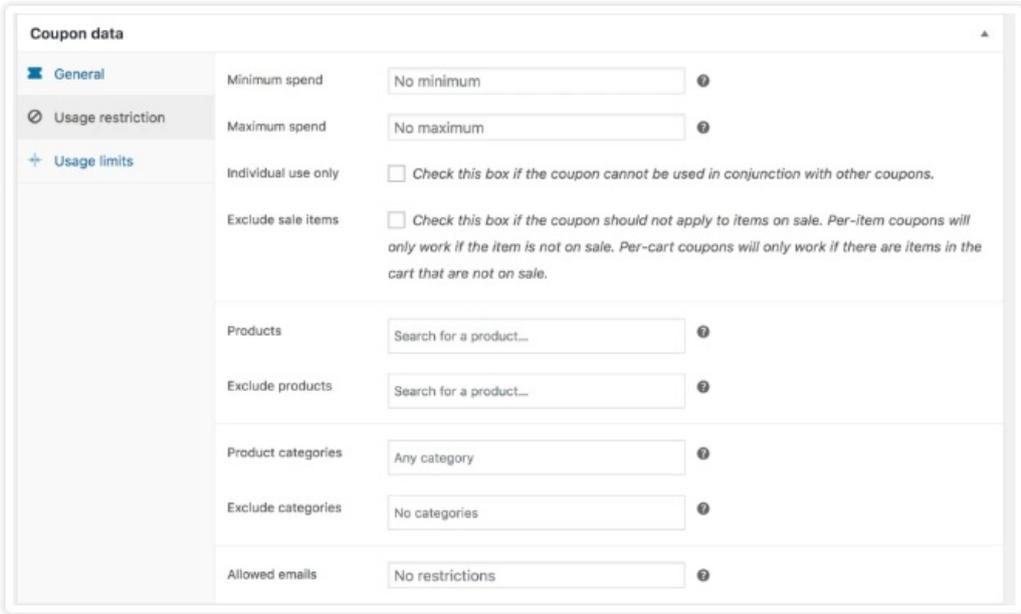

Check this box if the coupon grants free shipping. A [free shipping method](#) must be enabled in your shipping zone and be set to require "a valid free shipping coupon" (see the "Free Shipping Requires" setting).

- **Discount type:**
 - **Percentage discount** – A percentage discount for selected products only. For example, if the cart contains three (3) t-shirts @ \$20 each = \$60, a coupon for 10% off applies a discount of \$6.
 - **Fixed cart discount** – A fixed total discount for the entire cart. For example, if the cart contains three (3) t-shirts @ \$20 each = \$60, a coupon for \$10 off gives a discount of \$10.
 - **Fixed product discount** – A fixed total discount for selected products only. Customer receives a set amount of discount per item. For example, three (3) t-shirts @ \$20 each with a coupon for \$10 off applies a discount of \$30.
- **Coupon amount** – Fixed value or percentage, depending on discount type you choose. Entered without a currency unit or a percent sign, which are added automatically, e.g., Enter

'10' for £10 or 10%.

- **Allow free shipping** – Removes shipping cost when coupon is used. Requires Free Shipping to be enabled.
- **Coupon expiry date** – Date the coupon should expire and can no longer be used. Expiry happens at 12:00 am or 00:00 on the date chosen. If you want a coupon to be valid through Christmas Day but invalid the moment Christmas is over, set the expiration date to YYYY-12-26 as it will expire on YYYY-12-26 00:00. It uses your site's time zone setting at Settings > General > Timezone in WordPress.

Usage Restrictions

The screenshot shows the 'Coupon data' settings page in WordPress. The 'Usage restriction' section is expanded, showing various options for limiting coupon use. The 'General' section is also visible, showing 'Minimum spend' and 'Maximum spend' set to 'No minimum' and 'No maximum' respectively. The 'Usage limits' section is collapsed.

Coupon data	
General	Minimum spend: No minimum
Usage restriction	Maximum spend: No maximum
Usage limits	Individual use only: <input type="checkbox"/> Check this box if the coupon cannot be used in conjunction with other coupons.
	Exclude sale items: <input type="checkbox"/> Check this box if the coupon should not apply to items on sale. Per-item coupons will only work if the item is not on sale. Per-cart coupons will only work if there are items in the cart that are not on sale.
	Products: Search for a product...
	Exclude products: Search for a product...
	Product categories: Any category
	Exclude categories: No categories
	Allowed emails: No restrictions

- **Minimum spend** – Allows you to set the minimum subtotal needed to use the coupon. Note: The sum of the cart subtotal + tax is used to determine the minimum amount.
- **Maximum spend** – Allows you to set the maximum subtotal allowed when using the coupon.
- **Individual use only** – Tick the box if you don't want this coupon to be used in combination with other coupons.
- **Exclude sale items** – Tick the box if you don't want this coupon to apply to products on sale. Per-cart coupons do not work if a sale item is added afterward.
- **Products** – Products that the coupon will be applied to, or that need to be in the cart in order for the "Fixed cart discount" to be applied.
- **Exclude products** – Products that the coupon will **not** be applied to, or that **cannot** be in the cart in order for the "Fixed cart discount" to be applied.

- **Product categories** – Product categories that the coupon will be applied to, or that need to be in the cart in order for the “Fixed cart discount” to be applied.
- **Exclude categories** – Product categories that the coupon will **not** be applied to, or that **cannot** be in the cart in order for the “Fixed cart discount” to be applied.
- **Allowed Emails/Email restrictions** – Email address or addresses that can use a coupon. Verified against customer’s billing email. WooCommerce 3.4+ also allows you to include a wildcard character (*) to match multiple email addresses, for example, `*@gmail.com` would make any gmail address.

Usage Limits

The screenshot shows the 'Coupon data' section of the WooCommerce admin interface. It features a sidebar with three tabs: 'General', 'Usage restriction', and 'Usage limits'. The 'Usage limits' tab is currently selected. The main content area displays three settings:

Setting	Value
Usage limit per coupon	Unlimited usage
Limit usage to X items	Apply to all qualifying items in cart
Usage limit per user	Unlimited usage

- **Usage limit per coupon** – How many times a coupon can be used by all customers before being invalid.
- **Limit usage to X items** – How many items the coupon can be applied to before being invalid. This field is only displayed if there is one or more products that the coupon can be used with, and is configured under the Usage Restrictions. **(Note: Option is only available if you are creating a Product Discount coupon.)**
- **Usage limit per user** – How many times a coupon can be used by each customer before being invalid for that customer.

Once you’ve configured all settings, select **Publish** and your coupon is ready to use.

Sending Coupons

Once coupons are published, go ahead and make available to customers: Copy the title and send, advertise it via email, social media and onsite banners.
