

Events

Last Modified on 16/12/2024 2:40 pm AEDT

NOTE: This add on has to be enabled for your organisation. To check if this is available for your website, check Your Website Features.

The Events tab makes use of a WordPress plugin to deliver Events. There is also an option to use our GameDay Events platform, and eCal to have event data fed to your website.

1. Under the **SECTIONS** header click on the **EVENTS** tab.

The screenshot shows the 'Sections' configuration page. At the top, there is a 'Sections' header with a dropdown arrow. Below it is a 'help' link and a note: 'These sections will be used to build your home page. They can also be added to sub pages on your website.' A horizontal menu contains various section types: Banner, Tiles/Counter, News, Match Centre, Social Feed, Video Feed, Counter, GameDay Events, **Events** (selected), CTA, Partners, Additional Partners, and Custom Content. The main content area is divided into several panels: 1. 'Overview' panel with a 'Show' button and a 'help' link. 2. 'Show Panel' panel with a 'Show or hide this panel' label and a 'Show' button. 3. 'Panel Order' panel with a label '1 = top of page' and a text input field containing '9'. 4. 'Background Colour' panel with a label 'Set a custom colour for this section' and a 'Select Color' button. 5. 'Background Image' panel with a label 'Set a background image for this section, will override background colour.' and an 'Add Image' button. Below these panels are two input fields: 'Event Heading' containing 'Events' and 'Event More Link' containing 'https://cerberusdemo.fspdev.com/events/'.

2. If this panel is not set to show on your website yet, then make sure you **click the button to SHOW** this widget on your website and **adjust the order** of where you would like this to sit within your website.

3. You can also add a specific background colour for this panel or even an image.

This screenshot is identical to the one above, showing the 'Sections' configuration page for the 'Events' tab. It includes the same menu, panels for Overview, Show Panel, Panel Order, Background Colour, and Background Image, and the Event Heading and Event More Link input fields.
