Adding Players

Last Modified on 16/12/2024 2:54 pm AEDT

The player list needs to be created in conjunction with team creation. By creating and assigning players to teams, this allows them to display on the team page.

NOTE: players can only be created if the **PLAYER LIST PAGE ADD ON** is enabled for your organisation. To check if this is available for your website, check your GameDay Dashboard.

To add players and assign them to teams:

Make sure your teams are added first so you can assign, however teams can be assigned for a player at any point.

- 1. Hover over CONTENT.
- 2. Hover over TEAMS.
- 3. Click on ADD NEW PLAYER.

This process can also be done from the **ALL PLAYERS** listing as well.

4. Input players name into the title box.

5. Input relevant information related to the player in the content box (optional). This can be background, playing history, milestones etc.

Add New Player
